# Chapter 1

## Class Index

### 1.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">TallySheet&lt; T &gt;</a>	
Manage tallies for a collection of values . . . . .	<a href="#">3</a>

## Chapter 2

# Class Documentation

### 2.1 TallySheet< T > Class Template Reference

Manage tallies for a collection of values.

```
#include <TallySheet.h>
```

#### Public Member Functions

- [TallySheet](#) (const T &minVal, const T &maxVal)  
*Create an initially empty tally sheet.*
- [TallySheet](#) (const [TallySheet](#)< T > &other)  
*Make a copy of the given instance.*
- [TallySheet](#)< T > & [operator=](#) (const [TallySheet](#)< T > &other)  
*Assign one instance the state of another.*
- [~TallySheet](#) ()  
*Destruct the current instance.*
- void [increment](#) (const T &val)  
*Increment the tally for the respective value.*
- int [getCount](#) (const T &val) const  
*Return the total number of current tallies for the given value.*
- int [getTotalCount](#) () const  
*Return the total number of current tallies.*
- void [writeTable](#) (std::ostream &out) const  
*Write a comprehensive table of results Report each value, the count for that value and the percentage usage.*

#### 2.1.1 Detailed Description

```
template<typename T>  
class TallySheet< T >
```

Manage tallies for a collection of values.

Values can be either from a consecutive range of integers, or a consecutive sequence of characters from the alphabet.

## 2.1.2 Constructor & Destructor Documentation

### 2.1.2.1 TallySheet()

```
template<typename T>
TallySheet< T >::TallySheet (
    const T & minVal,
    const T & maxVal )
```

Create an initially empty tally sheet.

#### Parameters

<i>minVal</i>	the minimum acceptable value for later insertion
<i>maxVal</i>	the maximum acceptable value for later insertion

## 2.1.3 Member Function Documentation

### 2.1.3.1 writeTable()

```
template<typename T>
void TallySheet< T >::writeTable (
    std::ostream & out ) const
```

Write a comprehensive table of results Report each value, the count for that value and the percentage usage.

#### Parameters

<i>out</i>	an open output stream
------------	-----------------------

The documentation for this class was generated from the following file:

- /Users/Victor/Desktop/Cpp-Refresher/Cpp-Project-Exercise/tally\_sheet/TallySheet.h
